Subject Index, CIT Vol. 2, N° 1–4

3D terrain representation, 233
3D-modeling, 309
Action vision, 211
Active contour models, 211
Anti-windup method, 327
ATM switching, 319
Autocorrelation function, 77

Branch and bound algorithms, 25

Capacitated concentrator location, 1
CLA — Coded Light Approach, 309
Computer vision, 155, 201
Computer-based virtual classroom, 265
Conceptual graphs, 293
Cooperation, 103
Cost allocation, 1

Data association, 25
Database inference, 293
Dataflow graphical language, 39
Decoupling compensator, 327
Decoupling method, 327
Depth data, 309
Determinant, 15
Digital map processing, 233
Distance learning, 251

Engineering paradigm, 277
Expectation, 201
Expert systems, 103, 181
Formal methods, 277
Fourier transform, 223
Fuzzy dependence, 193
Fuzzy logic, 181
Fuzzy relation, 193

G-net model, 193
Game theory, 1
Generalized cylinders, 155
GPS positioning, 233
Graphical language, 39
Greedy algorithms, 25

Hidden Markov models, 201
Hierarchical knowledge base, 167
Hypertext, 123

Image compression, 233
Image histogram, 77
Incidence structure, 9
Indexing, 9
Inference classification, 293
Inference models, 293
Inference representation, 293
Inference target, 293
Inheritance, 167
Intelligent tutoring systems, 123
Interconnection networks, 67

Kanerva sparse distributed memory model, 167
Knowledge base, 167
Knowledge representation, 103, 181, 193

Lagrangian relaxation algorithms, 25
Language Z, 277

Maintenance factors, 51
Maintenance techniques, 51
Mapping and allocation algorithm, 67
Maximization algorithm, 201
Maximum entropy segmentation, 77
MIMD, 15
Missing information principle, 201
Moiré tomography, 223
Multi-dimensional assignment problems, 25
Multitarget tracking, 25
Multivariable system, 327
Music learning, 123

Neural networks, 103

Open learning, 251

Parallel algorithms, 15
Pattern recognition, 181
Performance analysis, 319
PRAM, 15
Prepared vectors, 9
Preventative maintenance, 51
Profilometry, 223
Pulmonary function testing, 223

Quality in education, 251
Query language, 39

Range data, 309
Range image, 309
Real-time image processing, 211
Real-time tracking, 211
Reduced variance approximation, 319
Reengineering, 51

Segmentation, 77
Shared buffer, 319
Software development, 277
Static knowledge, 193
Statistical object recognition, 201
Superquadrics, 155
Surface patch, 309

Teaching/learning proccess, 265
Terrain environment, 233
Threshold selection, 77

Time dependence, 193
Transputer-based systems, 67
Tridiagonal matrix, 15
Tutoring strategies, 123

University education, 251

Virtual classrom, 265
Visual specification, 39
Volumetric model, 155

X cluster, 265
