

## Subject Index, CIT Vol. 1, N° 1–4

---

- Anaphor, 213
- Architecture of an Intelligent system, 15
- Architecture simulation, 183
- ATLAS, 183
- Bayesian probability estimate, 37
- Binary search, 199
- Bottleneck weighted matching problem, 199
- C-command, 213
- Cache consistency, 165
- Computational complexity, 99
- Computer architecture, 47, 165
- Configurable microprocessor simulator, 183
- Connection machine, 29
- Control/data driven architecture, 47
- Data level parallelism, 29
- Dataflow computing, 47
- Dataflow graph scheduling, 47
- Dataflow graph synchronisation, 47
- Demon, 57
- Digital design, 183
- Discrete event simulation, 1
- Expert system, 15, 37, 57
- Finite automation, 111
- Foreign language learning, 15
- Frame-based programming, 57
- Functional dependency, 123
- Gauss-Seidel algorithm, 99
- Generalised Hough transform, 173
- Geographical information systems, 243
- Geometric property of image set, 173
- Governing category, 213
- Hardware description language, 183
- Hector multiprocessor, 165
- Hierarchical structure of 2-D pattern, 173
- Hough transform, 173
- Hungarian method, 199
- Hybrid architecture, 47
- Hypercard, 1
- Information systems development, 235
- Information systems strategy, 273, 285
- Information technology, 133
- Innovation, 133
- Integrity constrains, 111
- Intelligent tutoring system, 15
- Jacobi algorithm, 99
- Knowledge base, 57
- Knowledge representation, 37
- Knowledge-based system, 15
- Language for microprocessor architecture simulation, 183
- Local curve theory, 173
- m-estimate in rule induction, 37
- Machine learning, 37
- Manufacturing, 205
- Minimax problem, 199
- Model specification, 1
- Multicriterional analysis, 243
- Multiprocessor, 165
- Multivalued dependency, 123
- Parallel iterative algorithm, 99
- Participation, 235
- Path algebra, 99
- Path problem, 99
- Pattern recognition, 173
- Pronominal, 213
- Prototyping, 235
- R-expression, 213
- Recognition of handwritten symbols, 173
- Regular set, 111
- Relational database, 111
- Relational database dependency, 123
- Ring based multiprocessor, 165
- Risk evaluation, 57
- Rule induction, 37
- Rule-based expert system, 15
- Rule-based programming, 57
- Scalable coherent interface (SCI), 165
- SCI node model, 165
- Semantic integrity, 111
- Simulation, 183, 205
- SODA method, 273
- Soundness, 123
- Subset dependency, 123
- System of distinct representatives, 199
- Tableau system, 123
- Tabu search, 29
- Tightly coupled multiprocessor, 99
- Travelling salesman, 29
- Two-opt move, 29
- Urban rent, 243
- User's survey, 205
