

Brief of Minutes

Association of Research Libraries

June 21, 1953, Los Angeles

THE FORTY-FIRST MEETING of the Association of Research Libraries was held in the William Andrews Clark Memorial Library, at the University of California, in Los Angeles, on Sunday, June 21, 1953. Two meetings, morning and afternoon, were required to transact the business of the Association.

FARMINGTON PLAN

A volunteer is still needed to take the responsibility for Finnish language publications. Extension of the Plan to Ethiopia, Japan, and North-West Africa has not yet been possible. A study on coverage and assignment of the Latin American countries not now included in the Plan is under way and a report may be expected at the next meeting. Also under consideration as to coverage and assignment are French Canada, New Zealand, Oceania, and the Union of South Africa.

The *Handbook* of the Farmington Plan (authorized at an earlier meeting of the Association) is now in type. It will be printed by the Harvard University Press in a two-column format similar to that of the *Harvard Library Bulletin*. Complimentary copies of *The Handbook* will be given to participating libraries, agents, and advisers. *The Handbook* will be placed on sale by the executive secretary at \$2.50.

Inclusion of textbooks in the coverage of the Farmington Plan was discussed. The present policy of including college texts but excluding texts of a lower level is to be continued pending further study.

A report was made by the executive secretary on the work of the Bibliothèque Nationale in supplying French books. As to non-trade books, there was, in his opinion, no dealer who could improve on the service of the Bibliothèque Nationale. The supply of trade publications, however, appears to need investigation and improvement. No suggestion was made that another agent be employed for French publications.

Mr. Metcalf announced his resignation

from the committee and the following resolution, presented by Mr. Clapp, was unanimously adopted:

Resolved: That the Association of Research Libraries, aware of the fact that the progress attained in the realization of the Farmington Plan would have been impossible without the unremitting efforts of Keyes D. Metcalf, the first and until now the only chairman of its Farmington Plan Committee, do now, upon Mr. Metcalf's retirement from the Chairmanship of the Committee, acknowledge its recognition of and its gratitude for the important service which he has rendered in that capacity to American librarianship and scholarship.

That at the same time, the Association acknowledge its indebtedness for the valuable assistance rendered to the development of the Farmington Plan by Mr. Edwin E. Williams, as Mr. Metcalf's coadjutor.

Mr. Downs, a member of the Farmington Plan Committee, will succeed Mr. Metcalf as chairman.

PROPOSALS FROM THE LIBRARY OF CONGRESS

I. Proposed Plan for the Protection of Cultural and Scientific Resources.¹

The plan proposed by Scott Adams was referred to the Committee on National Needs, which in turn recommended the appointment of Mr. Logsdon of Columbia, as a committee of one to follow the development of the plan.

II. Proposal for Cooperative Microfilming of Folklore Collections Abroad.

This carefully prepared plan of folklore specialists and the Library of Congress was referred to the Committee on Cooperative Microfilm Projects.

III. Need for Standardization of Transliteration Schemes.

A motion was made that ARL proceed to

¹ Adams, Scott, "Proposed Plan for the Preservation of Cultural and Scientific Resources," May 22, 1953, 7p. (multilithed).

enlist in a joint committee the appropriate organizations of linguists to consider and propose transliteration schemes for all languages in the non-Roman alphabets, except those for which acceptable transliteration schemes are in existence.

IV. Standardization of the Cataloging of Chinese, Japanese, and Korean Publications.

It was noted that the Division of Cataloging and Classification is appointing a special committee to work on this problem and that the Library of Congress has appointed an inter-departmental committee to study aspects of the same problem. It was agreed that all ARL libraries concerned should communicate their interest and support to the DCC committee.

V. Acquisition of Current Foreign Newspapers.

The recent publication by the Library of Congress of *Postwar Foreign Newspapers, a Union List* and the imminent publication by the Pan American Union of its union list of Latin American newspapers provide the basis for a study of the adequacy of the national coverage of the foreign press, for recommendations for expansion or changes in the current program of acquisitions, and for a co-operative microfilming program which will best utilize the national resources available for this purpose.

The Committee on National Needs has undertaken a study of the problem as related to the so-called "critical areas." The problem has also been called to the attention of the new ARL committee on Cooperative Access to Newspapers and Other Serials.

CATALOGING FOR RESEARCH LIBRARIES

At the Evanston meeting in February, 1953, Mr. Reichmann proposed that the Association give serious consideration to the relationship between the structure of the research library and the most efficient catalog (or catalog philosophy) for a research library. Specific suggestions advanced by Mr. Reichmann were discussed by teams representing Harvard, Pennsylvania, California, the New York Public Library, and the Library of Congress. It was agreed that the proposals merited serious study and they were referred to a com-

mittee consisting of Mr. Shaw, chairman, and Messrs. Metcalf, David, Russell, and Dix.

COMMITTEE ON THE PUBLICATION AND RECORDING OF DISSERTATIONS

Thirty-six universities are now participating in the publication program suggested by ARL, the essential features of which are prompt reporting in *Dissertation Abstracts* and prompt availability of microcopies. A statement of the committee, explaining the details of the publication program, was presented and approved, and will be distributed to colleges and universities shortly.

INDEX TO DOCTORAL DISSERTATIONS

Mr. Trotier reported that the preparation of an Index to the first ten volumes of *Doctoral Dissertations* will be commenced in the fall. The publication of the Index may be expected within a year.

REPRODUCTION OF MANUSCRIPTS IN MASS

What shall a university library, with a large collection of unpublished manuscript material, do, when it receives a request for wholesale copying of manuscript material? The question was raised by Mr. Babb, who reported that Yale had in recent years received requests from three institutions for wholesale copying of Coe manuscript material. The prevailing sentiment of the discussion was for liberality in copying manuscript collections. There were, however, reservations on the part of some who felt that priority in the use of manuscript materials remains with the owning library and its staff including faculty. A full statement of ARL policy on the use of manuscript materials appeared in *C&RL* January, 1952, p. 58-60.

THE NEED FOR A NATIONAL CONFERENCE ON LIBRARY PROBLEMS

The need for such a conference was specified by the speakers in the discussion on mass publication or copying of manuscript materials. Mr. Metcalf also brought forward the problem of library fees and library support as pressing for solution. Mr. Horn stressed the problems of growth and finance which complicated the legislative budget hearings in California.

REPORT ON SERIALS COMMITTEE

The matter of differential pricing (library

subscriptions costing more than individual subscriptions) was thoroughly reported and documented. Mr. Brown's report concluded that except for the *Journal of Rational Mechanics* and the publications of the H. W. Wilson Co., the differential charges are minor. No action was authorized but the matter of differential pricing will be continuously studied by the Association.

SUPPORT OF LIBRARY OF CONGRESS FOR UNION CATALOG

In view of the present state of the Union Catalog, with some three million cards unfiled and needing editing, it was agreed that directors of ARL libraries should seek the support of Congress in finding funds for the completion of the Union Catalog.

COOPERATIVE ACCESS TO NEWSPAPERS AND OTHER SERIALS

This committee was authorized under a different title at the Evanston meeting. Mr. Fussler, as chairman of the committee, reported that the first attention of the committee would be given to foreign newspapers, or the development of a statement of appropriate criteria for acquisition, a list of newspapers meeting the criteria, and a proposal for cooperative access to these newspapers.

JOINT COMMITTEE ON THE REPRODUCTION OF OUT OF PRINT BOOKS

The Joint Committee, under the chairmanship of Mr. Keller of the Library of Congress, announced: 1. it has reprinted Adeline's *Art Dictionary* in an edition of 100 copies, with a second run of an additional 100 now in press; 2. it has in press three titles as follows: *The Checklist of U. S. Public Documents, 1789-1909*; Ames' *Comprehensive Index to the Pub-*

lications of the U. S. Government, 1881-1893; and Poore's *Descriptive Catalogue of the Government Publications of the United States, Sept. 5, 1774 to March 4, 1881*; 3. it has permission and is ready to start work on these three titles: Julian's *Dictionary of Hymnology*; Mulhall's *Dictionary of Statistics*; Orr's *Handbook to the Work of Robert Browning*; 4. it is considering the reprinting of the *Index to the British Sessional Papers*, with the corrections and has written to H.M.S.O. for permission.

POSTAL RATES ON THESES

The executive secretary was authorized to investigate the possibility of classifying typed theses as "books" in the mailing of inter-library loans. With Mr. Shaw's aid, the matter was investigated, but it was discovered that there is no possibility for such a classification without major legislative revision.

CUSTOMS SIMPLIFICATION

Mr. Vosper discussed the pending Customs Simplification Act and the possible elimination of all requirements of formal entry. (This act was passed and signed by President Eisenhower on August 8, 1953.) Investigation of duty charges on imported microfilm and foreign built microphotographic equipment will be made by Mr. Vosper, and interpretations from the Treasury Department may soon be expected.

NEXT MEETING

Subject to negotiations with the University of Wisconsin and the development of plans for the dedication of the new Wisconsin University Library building, the mid-winter meeting of ARL was announced for the week end of January 31, 1954, at Madison, Wisconsin.—*Robert A. Miller, Executive Secretary.*

Drexel Offers Scholarships

The Drexel School of Library Science, Philadelphia, Pa., is offering three tuition scholarships for the academic year 1954-55. They are available to students entering the full time curriculum leading to the degree of Master of Science in Library Science who apply by April 1, 1954. Applicants must be American citizens, and graduates of approved colleges or universities. Evidence of high academic achievement and of the need for financial aid must be submitted. Questions about scholarships available to foreign students may also be addressed to the Dean.

College and University Library Statistics

Again this year the statistics were gathered and tabulated as quickly as possible in order to be useful to librarians who prepare budgets in the winter months. The statistics were compiled by the following members of the ACRL Statistics Committee, chairmanned by G. Flint Purdy of Wayne University: Group I by Dale M. Bentz, State University of Iowa; Group II and Group III by Dan Graves of the Municipal University of Wichita; and the Teachers College data by Wendell W. Smiley of East Carolina College.

While no junior college figures are given here, data on fifty junior college libraries were collected for the first time this year and issued in the *Junior College Libraries Section Newsletter* for November, 1953. The ACRL office has a small supply of *Newspapers*, and copies will be sent to members of other ACRL sections on request.

Group I attempts to include institutions which grant a significant number of doctors' degrees as well as all state universities. Group II covers other institutions, some of which of course have far better library resources and support than libraries in Group I. The distinction between II and III is library operating budget, and \$30,000 is used as the dividing line. Space and publication problems prevent the drawing of hard and fast rules.

Group I Statistics were received from 82 institutions as compared with 90 for 1951-52. All libraries that submitted reports with information in all categories are included in this year's tables.

For the first time there is some salary information given for all institutions although sixteen libraries withhold this important data for the top administrative positions. Many gaps exist because the reporting libraries failed to submit the median figures. Other omissions are necessary because personnel is classified differently from the columnar headings. When blank spaces are not footnoted, there is no personnel in those positions.

A greater number of institutions have shown a decrease in total library operating

budget this year. Twenty-five libraries, or 36.7%, showed a decrease this year in comparison with seven, or 11.6%, for the previous year. (D.M.B.)

Groups II & III Fewer libraries falling in Groups II and III reported this year. Only 140 reports were received as compared with 158 last year and 142 the year before. All but four reports were used in this compilation.

For comparative purposes, it is desirable to have a continuity of institutions included in the reports from year to year, but the percentage of continuity is less this year than last. Forty-six of the 67 libraries (or 69%) used in Group II below were used last year. In last year's report, 43 of the 58 libraries (or 74%) used had been used the year before. In group III below, 45 of the 69 libraries (or 65%) were used last year. In last year's report, 53 of the 70 libraries (or 76%) had been used the year before.

Although financial statistics, including those for salaries, are of greatest interest to the membership of ACRL, too many figures are still omitted in the questionnaires or are reported in confidence. A comparison of chief librarians' salaries, for instance, shows that in Group II last year, 33% were not reported while 40% were not reported this year. In Group III, 7% were not reported last year and 12% this year.

Medians were determined from the figures appearing without footnotes. (D.G.)

Teacher College Libraries It is still a dream of the tabulator that more teachers college libraries will send in their reports early enough so that at least the maximum number be included in the tabulations under the present space limitations. This year there was room for at least a "baker's dozen" more. In spite of the fact that a few of the reports were incomplete in many respects, all reports received are included again this year. Several reports failed to include salary statistics for the top administrative positions. (W.W.S.)
