Sylloge Fungorum...

Volume 26

Supplementum Universale pars XI

By Alex. Trotter

Volume 26 of *Sylloge Fungorum* is the first supplement published since 1931, and constitutes a major contribution to present-day mycology. Assiduously prepared by Edith K. Cash from the manuscripts of Saccardo's son-in-law, Dr. Alessandro Trotter, this volume contains complete Latin descriptions of about 5000 species of fungi recorded through 1950, listing their essential characteristics and localities. A preface by Dr. Trotter's son, mycologist G.B. Trotter, is also included.

The completely new publication *Supplementum Universale pars XI* is a valuable addition to our earlier reprint edition of Volumes 1-25 of *Sylloge Fungorum* which describe close to 80,000 species. Mycologists, plant pathologists, and other scientists concerned with fungi will find Volumes 1-25 of *Sylloge Fungorum*, in conjunction with the new Volume 26, an indispensable tool for reference and research.
