

### Chinese government releases Yongyi Song

Yongyi Song, head of technical services at Dickinson College in Carlisle, Pennsylvania, was released by the People's Republic of China in late January. He had been incarcerated for six months under suspicion of illicit activities, including stealing and buying state secrets. He had traveled to China in June 1999 with his wife to do research for a book on the Chinese Cultural Revolution (*C&RL News*, October 1999).

Many worked for Yongyi's release, and Dickinson President William G. Durden expressed his gratitude to Senator Arlen Specter (R-Pennsylvania) for his efforts in securing the release, as well as to

More than 125 students learned about the world of libraries during the ALA Divisions' Job Shadow Day, February 2, 2000. Here students tour the Queens Borough Public Library. A full compliment of the activities that took place during Job Shadow Day will be shared in the April issue of *C&RL News* and on the Job Shadow Day Web site at [www.ala.org/acrl/jobshadowday.html](http://www.ala.org/acrl/jobshadowday.html).

The library community's first foray into Job Shadow Day was a success. Here participants listen to a presentation at Wayne State University.

Professor Jerome Cohan for his pro bono support of the college's legal efforts.

The library community rallied behind Yongyi, sending letters and petitions to the Chinese government. Upon his return, Yongyi sent a letter to ALA Executive Director William Gordon expressing his gratitude for the letter that ALA sent, "[ALA's petition letter] is a declaration of academic freedom by American librarians in the 21st century. It is a successful embodiment in the library profession of the 1948 Universal Declaration of Human Rights.

"Without your petition letter, without the rescue efforts by Dickinson College, the State Department, lawmakers in Congress and friends from all over the world, my academic career would have ended in a dark jail cell."

Yongyi added that he would continue his research on the Cultural Revolution and "dedicate the rest of my life to the establishment of the 'Cultural Revolution Memorial Museum' and the building of a 'Cultural Revolution Database.'"

## Chatham College outsources library services

Chatham College has awarded an 18-month contract to Library Systems & Services (LSSI) to manage its library. LSSI is working with the women's college to implement a new organizational structure that will bring librarians and information technology professionals together in a newly created Information Services Department. Bob Smith, former director of the Medina (Ohio) County Library, is LSSI's interim director at Chatham.

"Our strategy is to create a library environment that is more responsive to the needs of the faculty and students by providing resources that best reflect their needs," said Esther L. Barazzone, president of Chatham. "We are committed to making the Jennie King Mellon Library both the academic and technology epicenter of Chatham College."

## HighWire Press develops archiving plan

Stanford University Libraries' (SUL) HighWire Press has devised a comprehensive plan for preserving and assuring access to the more than 170 scholarly journals it hosts on the Web.

"Preserving and protecting information is one of the core functions of libraries," said Michael A. Keller, Stanford university librarian and publisher of HighWire Press. "We are just as concerned with the preservation of online journals as we are with preserving rare books and manuscripts. The techniques are different, but the goal is the same: to make sure the information remains available and accessible, now and in the future. Once a publisher instructs HighWire to enable access to a given article or piece, the community should be confident it will be at least as freely available in a decade or a generation as it is today." For this reason, migration of formats, standards, and media is a fundamen-

## ACRL conferences enhance your effectiveness

Let ACRL help you keep up with the changing nature of academic librarianship. Stay on the cutting edge by attending these informative educational opportunities.

- **Leading on Your Campus: ACRL Leadership Institute.** Discover how to analyze the changing climate of academic libraries, articulate a vision, and make your library a top-campus priority. Houston, April 11, 2000

- **Beyond Words—Visual Information in Special Collections, the Rare Books and Manuscripts Section preconference.** Explore the numerous forms of visual information found in collections and the challenges and opportunities offered by these electronic tools and formats. Chicago, July 5–7, 2000

- **Legislative Advocacy: Key Roles for Today's Academic Librarians.** Discover how to become a strong advocate for academic libraries and higher education issues on campus and beyond. Chicago, July 7, 2000

- **Library Instruction on the Web (Instruction Section preconference).** Immerse yourself in the issues and techniques surrounding the delivery of instruction via the Web. Chicago, July 7, 2000

- **Shining a Flashlight on the Library, Technology, and the Curriculum: (ACRL/TLT Flashlight Institute).** Design a study of information resources to take back to your institution. Chicago, July 7, 2000

- **Understanding the Licensing Landscape.** Explore licensing core issues and find out how to keep up with the changing nature of licensing. Chicago, July 7, 2000

- **ACRL/Harvard Leadership Institute.** Increase your capacity to lead and to manage and discover how to make your voice heard on campus. Cambridge, Massachusetts, July 30–August 4, 2000

Registration details for these programs can be located on the Web at <http://www.ala.org/acrl/confhp.html>. Save money with early bird registration for many of these programs. Deadline: March 17.

Contact Margot Sutton ([msutton@ala.org](mailto:msutton@ala.org); 800-545-2433, ext. 2522) if you have questions.

## Marist College opens new library

Marist College, located in Poughkeepsie, New York, opened the new James A. Cannavino Library designed by Perry, Dean Rogers and Partners of Boston, Massachusetts, this January. The 83,000 sq. ft., granite and sandstone structure is dramatically situated on the crest of the main quad area of the campus, overlooking the Hudson River. The \$19.6 million project took 16 months to complete, and was the recipient of a \$3 million gift from James A. Cannavino, CEO of CyberSafe in Issaquah, Washington, and a \$500,000 matching grant from the Kresge Foundation.

The library links the academic and residential sectors of the campus with entrances on the eastside and the westside of the building, allowing easy access from either side of the campus as students move to and from classes or their dorm rooms. The ample study spaces in the three story edifice enable 725 students to work individually or in small groups at soft seating, single or double carrels, study tables, or 18 small study rooms.

Digital functionality defines the central concept of the building, as it attempts to be a dynamic transitional space in the history of collection development, as collec-

tions rapidly evolve from paper to digital form. Although the building has the capacity for 235,000 volumes, we are already experiencing a rapid decrease in the need for maintaining and shelving paper materials. The library displays only 370 current paper periodical titles, while giving access to over 5,900 digital full-text periodical titles through the campus network.

The building encompasses all the principal features necessary for creating and sustaining a digital library. A robust network (3 LAN rooms) capable of transmitting large video files to 24 simultaneous users supports an array of servers (2 server rooms), collaborative digital work rooms (10) for producing and capturing content, 205 patron accessible workstations, 5 classrooms fully computerized for teaching and learning, and nearly 400 network jacks for student laptops. Thus the technology environment can be considered a physical digital library.

The library staff can use one of three different rooms for information literacy instruction, depending on the size of the class and the format of the materials covered.—*John W. McGinty, library director, Marist College, e-mail: John.McGinty@marist.edu*

tal issue addressed in the HighWire program.

SUL is also developing LOCKSS—Lots of Copies Keeps Stuff Safe—a distributed archiving model. Being developed in cooperation with Sun Microsystems and with National Science Foundation funding, LOCKSS is a freeware-based, voluntary approach to archiving online material that relies on consensus among several linked servers to determine authoritative states of files and restore lost or damage files automatically. Details

about LOCKSS are available at <http://hwm.stanford.edu/pdf/archive.pdf>.

## Best Practices in Information Literacy Programs

The ACRL Board at its Midwinter Meetings funded the first steps in the ACRL Institute for Information Literacy's (IIL) Best Practices initiative. One of IIL's three initiatives, Best Practices is an effort to advance the implementation of information literacy programs by developing a statement of the characteristics of effective information literacy programs and identifying model programs. Information about IIL initiatives may be found at <http://www.ala.org/acrl/nili/nilihp.html>.

Once characteristics and model programs are identified, this information will be featured in a national conference.

A seven member Best Practices Project Team will include five librarians and two nonlibrarian professionals involved in information literacy programs in higher education. The team will use a Delphi review process to solicit broad professional input; the selection of exemplary institutions will be through an application and review process.

The results of their work will be shared through programs and publications. A fuller de-

scription of the program is available at <http://www.earlham.edu/~libr/Plan.htm>.

Questions may be directed to Thomas G. Kirk Jr., college librarian, Earlham College, Richmond, IN 47374, (765) 983-1360 or [kirkto@earlham.edu](mailto:kirkto@earlham.edu).

## NetPaper.com partners with Cornell

Cornell University Business Services has signed an agreement with NetPaper.com to implement its CAMPUS product, an Internet-based solution for the creation and on-demand printing of coursepacks and customized teaching materials. Rich McDaniel, Cornell Business Services director, said that CAMPUS, "adeptly addresses both sides of the information transaction—publishers' worries about control of content and payment for use, as well as the college campus' desire to meet the information needs of professors and students in the most efficient, cost effective manner possible. Through the NetPaper.com CAMPUS services, Cornell's course packs are sent to a regional on-demand printing facility. Cornell hopes that use of CAMPUS will reduce their capital investment and maintenance costs and increase their capacity. ■

When most of us were in college,  
this was the only Web that  
caused immediate concern.

Help students and faculty find a  
way through the Web—order more  
copies of the CHOICE Web  
Review Issue!

Special supplement, August 1999.

Reviews some 600 research-related Internet sites,  
and has some really nifty features and articles.

You'll want to order extra copies for the library,  
and don't forget to get one for yourself, too!

\$24.00 a copy, 1 to 4 copies

\$21.50 each, 5 to 9 copies

\$19.00 each, 10 to 19 copies

\$17.50 each, 20+ copies

# AIP ONLINE— NEW FOR 2000

## Many New Titles Debut Online

AIP announces that *Journal of Physical and Chemical Reference Data* is now available online for the first time. Print subscribers are entitled to online access at no extra charge. *JPCRD* provides critically evaluated reviews of standard reference data in physics and chemistry. This is also the first year that MAIK Nauka translation journals distributed by AIP are available online. Access to this rich collection of Russian research is free to print subscribers and separate online subscriptions are available, as well. See [www.aip.org/journal\\_catalog/soclist.html](http://www.aip.org/journal_catalog/soclist.html) and click MAIK Nauka/Interperiodica.

## Save with Online Journal Subscriptions

AIP now offers online subscriptions at savings of up to 50%. AIP also offers you an expanded choice of online combination packages. These can help cut costs while adding titles to your collection. For information, contact [mktg@aip.org](mailto:mktg@aip.org).

## AIP Launches Two New Virtual Journals

The *Virtual Journal of Nanoscale Science and Technology* and the *Virtual Journal of Biological Physics Research* are online sites that collect related articles from a broad range of leading physical science journals. Spearheaded by the **American Physical Society** and the **American Institute of Physics**, these free sites give you quick, convenient access to cutting-edge research, plus all the functionality and power of an online journal. The growing list of more than 45 participating journals represents some of the most prestigious scientific and technical societies.

# "OUR MOST POPULAR BUSINESS REFERENCE SOURCE..."

Robin Gardella  
Southfield Public Library  
Southfield, MI

Our directories get used, abused and mangled. Why? Because everybody needs our reference products for everyday life. For example:

- JOB SEEKERS
- SALES PEOPLE
- ENTREPRENEURS
- STUDENTS
- CONSUMERS
- PROFESSORS
- NEWS MEDIA
- LAW LIBRARIES

infoUSA Inc.'s products contain company name, address, phone number, SIC code, estimated sales volume, number of employees, credit rating code\*, key executive names, and more. Virtually all U.S. businesses - public and private.

**Internet Access - ReferenceUSA®** Enjoy real-time access to the world's finest database of 10.5 million businesses and 100 million U.S. residents with comprehensive coverage, accuracy and instant access to information. And that's just the beginning! With its power, speed and user-friendly interface, ReferenceUSA becomes the most effective, easy-to-use reference tool available. Customized reports, immediate downloads and business profiles are a snap!

**American Business Disc®** is the ultimate reference tool for Libraries. Imagine having over 10 million businesses on a single CD-ROM! Search by Company Name, Address, SIC Code(s), Yellow Page Heading, Sales Volume, Number of Employees, Geographically by ZIP Code(s), City(ies), State(s), or even the entire U.S.

**American Manufacturers Directory & CD-ROM** contain every manufacturer in the U.S. with 20 or more employees, more than 168,000 total listings - all in two volumes. The CD-ROM contains all 645,000 manufacturers.

**Big Businesses Directory & CD-ROM** include America's largest companies, 193,000 companies that employ 100 or more people. This directory also includes 703,000 top Executives and Directors.

**State Business Directories** are the most popular directories in every reference department. Before your patrons research any other source, point them to our publications. Four easy-to-use sections include: Businesses by City, Businesses by Yellow Page Category, Major Employers, and Manufacturers by City and Product.

**State Credit Directories & CD-ROM** are the most convenient Business Credit Reference Tools available! They make finding credit information fast, easy and affordable for all 50 states, plus Washington, D.C. And the business information included is invaluable for many applications.

\* Our Credit Rating Codes are indicators of probable ability to pay. They are based on business demographic factors such as number of employees, years in business, industry stability, all paying history, business history, and government data. We recommend that these ratings be used primarily as a starting point and should not be the sole factor used in making a credit decision. You must obtain more information from local and trade references, local credit bureaus, or other sources before extending credit. We will not be held for any losses resulting from the use of this information.
