

Wayne State opens wired library

Wayne State University officially opened its new \$35 million Undergraduate Library on September 12. On opening day, the 300,429 square foot, three-story building had 700 computers, with an additional 700 access points. The 2,700-seat facility, designed specifically around the needs of freshman and sophomores, aims to reduce the "library anxiety" often experienced by first-time college students.

"Many of our students come from high schools that have small libraries with very limited resources," explained Patricia Senn Breivik, dean of university libraries. "So, when they walk into a large university library they may feel overwhelmed. One of our goals is to make the library experience more comfortable and less intimidating."

The user-friendly facility has a snack area, a television viewing area that professors can request specific programming for, a 24-hour study facility, conference rooms, and a 150-seat auditorium. The library also houses a new Office for Teaching and Learning, a place where faculty can familiarize themselves with the latest instructional technology; a drop-off copy center; and a presentation software laboratory for learning how to prepare computer-generated visuals for papers and presentations.

The library also shares space with a new bookstore operated by Barnes & Noble. A main-floor atrium area designated "Windows on the Arts" will feature presentations such as poetry readings, scenes from plays, music ensembles, dance and art exhibitions, and even a fencing demonstration.

"Part of getting through the college experience is enjoying it," said Breivik. "Yet, a great many of our students have commitments that prevent them from attending cultural events. We're importing some of those things right

into the building so students will literally be able to trip over the arts."

In keeping with the philosophy behind the new building, Wayne's traditional one-credit freshman library skills survival course has been redesigned, renamed "Information Power," and will be housed in the new building.

For more information, visit the Undergraduate Library's homepage at <http://www.libraries.wayne.edu/ugl/>.

New York history to be preserved and accessible

New York University (NYU) and the New-York Historical Society have agreed to preserve historical documents about the history of New York as well as 18th- and 19th-century America and give greater public access to this material.

Under the terms of the agreement, NYU's dean of libraries Carlton Rochell will oversee the cataloging and preservation of the society's library collections. In return, the catalog records describing these collections will be included in NYU's Internet-based online catalog, BobCatPlus.

Materials in the Historical Society's collection include correspondence leading to the duel between Aaron Burr and Alexander Hamilton, the terms of surrender presented by Gen. Ulysses S. Grant to Gen. Robert E. Lee, original photos documenting construction of the city's

Wayne State University's new Undergraduate Library is fully wired, featuring 700 computer workstations with 700 more access points.

subway system, letters and papers from every U.S. president from George Washington to Franklin Delano Roosevelt, and 130,000 early photographic prints, including many by Matthew Brady.

This collaboration is made possible by a \$2.85 million grant from the Andrew W. Mellon Foundation and a \$300,000 gift from Madeline and Kevin Brine. The funding will also enable the society to extend its hours to five days a week, restoring easy access for researchers and making the society's collections more fully available.

The Mellon grant will support the first three years of an overall five-year project.

All collections will remain the property of the New-York Historical Society. All work will be done on the society's premises and all collections will remain located there. The collections of prints, photographs, and architecture, now administered by the society's museum, will be managed as part of the library and be relocated to an area adjacent to the library.

The Historical Society also plans to create a museum collections database through a project that will create and assemble digitized images of the museum's collections. Eventually the library and museum systems will have a seamless interface so researchers can search books, visual materials, and museum objects simultaneously.

ALA names 1997-98 Library Fellows

ALA has awarded twelve 1997-98 fellowships to 12 American librarians to undertake projects in Bolivia, Cyprus, El Salvador, Estonia, Germany, Japan, Moldova, Russia, Sri Lanka, Uganda, Vietnam, and the West Bank (Palestinian Authority).

ALA 1997-98 Library Fellows (l to r): Sarah Andeen, Beau Case, Roger Brisson, Kenning Arlitsch, Kathy Hummel, Steven Kerchoff, Sherry Little, Kimberli Morris, Michael Neubert, Susan Freiband, Helen Ives, and Michael Huff.

This will be the 11th year of the ALA Library Fellows Program administered by ALA and funded by the U.S. Information Agency. The program has sent 147 information ambassadors to more than 90 countries since 1987.

The 1997-98 ALA Library Fellows are: Sarah Andeen, reference librarian at the Superior Court Law Library in Phoenix, Arizona; Kenning Arlitsch, technology instruction librarian at the University of Utah; Roger Brisson, social sciences cataloger at Pennsylvania State University; Beau Case, assistant professor and librarian at Ohio State University Libraries; Susan Freiband, associate professor at the Graduate School of Library and Information Science at the University of Puerto Rico; Michael Huff, computer services librarian of the Central Rappahannock Regional Library in Virginia; Kathy Hummel, a librarian with the Santa Ana Public Library in California; Helen Ives, associate librarian at the American University in Washington, D.C.; Steven Kerchoff, program specialist with the FEDLINK Network of the Library of Congress in Washington, D.C.; Sherry Little, doctoral candidate at the School of Library and Information Studies at Texas Woman's University; Kimberli Morris, reference/systems librarian at the California Western School of Law; and Michael Neubert, senior reference librarian for the Library of Congress European Division in Washington, D.C. For details, contact Carol Erickson at (800) 545-2433, ext. 3200; e-mail: cerickson@ala.org.

SIRSI's UNICORN installations increase

Concordia University in Irvine, California, MiraCosta College in Oceanside, California; Athens Area Technical Institute in Athens, Georgia; North Metro Technical Institute in Acworth, Georgia; Paul Smith's College in Paul Smiths, New York; Central Texas College and University of Central Texas in Killeen, Texas have selected SIRSI's UNICORN client/server library system. These institutions will be installing WebCat, the World Wide Web Public Access Catalog and Z39.50 compliant interface.

Institutional priorities and faculty rewards update

The June 1997 issue of *C&RL News* included the draft statement prepared by the ACRL Institutional Priorities and Faculty Rewards Task Force (pp. 414–18). The statement is intended to be ACRL's contribution to the national Institutional Priorities and Faculty Rewards project, an initiative involving almost two dozen disciplinary associations to date. In addition to comments on the draft gathered from ACRL members via e-mail, the task force solicited feedback at a hearing held on June 28, 1997, at the ALA Annual Conference in San Francisco. Suggestions focused primarily on concerns that (a) the document might unintentionally imply that all of the functions described should be expected of all librarians, and (b) the document appeared to place too much emphasis on teaching and not enough on the range of activities often found in promotion and tenure policies under the category "Librarianship."

The task force has modified the draft statement in an attempt to address these concerns and has forwarded the revised document to be placed on the ACRL Web page (<http://www.ala.org/acrl.html>). Those without Web access may obtain a printed copy of the revised statement from the task force chair, W. Bede Mitchell, Belk Library, Appalachian State University, Boone, NC 28608; MITCHELLWB@APPSTATE.EDU. The task force intends to submit its final report to the ACRL Board of Directors at the Midwinter Meeting in New Orleans. The task force invites further suggestions and comments on the statement, which should be forwarded to the task force chair.

Established by Syracuse University's Center for Instructional Development and funded

by the Lilly Endowment with support from the Fund for the Improvement of Postsecondary Education, the Institutional Priorities and Faculty Rewards project aims to extend the range of faculty activities that are rewarded through promotion, tenure, and merit. Each disciplinary association is responsible for drafting a statement defining and describing the range of work performed by faculty in the discipline, including many activities that are often not adequately recognized within the traditional "publish or perish" paradigm. The first set of these statements may be found in *The Disciplines Speak: Rewarding the Scholarly, Professional, and Creative Work of Faculty*, edited by Robert M. Diamond and Bronwyn E. Adam (American Association for Higher Education, 1995).

Subsequent to the ALA Annual Conference, task force chair W. Bede Mitchell (Appalachian State University) and member Carol Parke (Syracuse University) represented ACRL at the Institutional Priorities and Faculty Rewards Summer Conference, July 17–20, 1997. In addition to hearing progress reports on the next round of disciplinary statements now being prepared, the conference attendees from more than a dozen of the project's participating disciplinary associations began working on guidelines for administrators, faculty, and collective bargaining agents who are involved in developing promotion, tenure, and merit pay policies. The guidelines are intended for eventual publication and will focus on policies, procedures, and criteria by which faculty should be evaluated in light of the work done by the disciplines participating in the Institutional Priorities and Faculty Rewards project.—*W. Bede Mitchell, Appalachian State University*

Other institutions with SIRSI systems are Stanford University, Carnegie Mellon University, the University of Virginia, and Emory University.

Ten more libraries pick UnCover's Gateway

Clemson, East Carolina, Florida Gulf Coast, Kansas State, Lehigh, Southern, and Louisiana Tech-

nical Universities, Monterey Bay Aquarium and Research Institute, Rennselaer Polytechnic Institute, and the University of Notre Dame have selected the UnCover Company's Gateway system. Libraries subscribing to the system can match their serials holdings with the UnCover database collection of 17,000 journal titles. This customized database can then be accessed by patrons using a powerful new Web-based in-

CIC members will provide access to their collections, provide consulting service in disaster recovery and material conservation, and supply much needed copies of books lost or damaged in the floods.

"UND faculty, staff, and students can simply request items as usual. We'll work with the CIC libraries to fulfill these requests," said Frank D'Andraia, director of the libraries, UND. "Our staff are particularly pleased about the offers of assistance with recovery of damaged materials, and the donation of replacement copies

terface to simultaneously search for library articles as well as those in the UnCover collection. If the article of interest is not available in the library, users can place a library-subsidized online order from UnCover. However, if the institution does own the item, an automatic block prevents the patron from ordering the article with library funds.

UnCover currently has 90 Gateways that represent hundreds of libraries, many of which use Gateways through consortia. Three new features have been added to the Gateway system: SUMO (Subsidized UnMediated Ordering) blocking on full-text databases, allowing libraries to automatically block orders from full-text databases, in addition to blocking orders from locally owned print journals; individual cap limiting for SUMO, allowing libraries to put a dollar or article limit on the amount of total subsidized orders for a particular group of users; and remote patron validation, which allows libraries to validate patrons without sending the full patron files to UnCover.

CIC aids flood victims

Member universities of the Committee on Institutional Cooperation (CIC) are partnering with the University of North Dakota (UND) to help the library meet the information needs of its users this year. On April 19, 1997, floodwaters inundated the UND campus, entering 72 of the 238 buildings and infiltrating 69 miles of buried steam and utility tunnels. The remainder of the spring semester was canceled, and the campus was closed until May 8.

of items that are missing or too damaged for recovery. The assistance provided by the CIC libraries will make a real difference in rebuilding our collections and services."

The CIC is a consortium of 12 major teaching and research universities in the Midwest, and comprises the Universities of Chicago, Illinois, Iowa, Michigan, Minnesota, and Wisconsin-Madison, as well as Indiana, Michigan State, Northwestern, Ohio State, Penn State, and Purdue Universities.

Hawaii's library school merges with computer sciences

The University of Hawaii Board of Regents approved the merger of the School of Library and Information Studies (SLIS) with the Depart-

ACRL chapter meetings 1997-98

Chapter	Date	Location

ment of Information and Computer Sciences (ICS) effective this fall. The consolidation will save the university about \$50,000 annually.

Oregon selects InfoTrac

A three-year plan to achieve statewide electronic resource sharing among Oregon's libraries has resulted in an agreement with Information Access Company (IAC) to provide 28 public and academic libraries with access to InfoTrac SearchBank. The contract means that 64 percent of Oregon's population will gain access to IAC's General Reference Center, Expanded Academic Index, Health Reference Center, and Business Index.

The Oregon Information Highway Project was the impetus for the agreement with IAC. In 1994, a group of public and academic librarians began developing a plan to connect all libraries to the Internet and to achieve broader access to electronic resources by aggregating demand throughout the state.

Deb Carver, associate university librarian at the University of Oregon and liaison between IAC and the Oregon database licensing task force, said that working out the terms and conditions of a consortium agreement among county, city, and academic libraries was challenging, but most participants viewed the process as an important investment. "We have paved the way for future agreements and created an infrastructure that will have major pay-offs," she reported.

Univ. of Puget Sound joins Orbis

The University of Puget Sound has become the 13th member of Orbis, a consortium of baccalaureate-granting public and private institutions of higher education in Oregon and Washington. The Orbis consortium provides a union catalog of the collective holdings of the participating institutions and a patron-initiated delivery system called Orbis Borrowing. Materials requested are delivered via library courier within 48 hours.

Orbis was established in 1993 with start-up funds from the Meyer Memorial Trust. The consortium is governed by a council consisting of the library directors of the member institutions. Orbis offices are housed at the University of Oregon. Current members include: Eastern Oregon University, George Fox University, Lewis & Clark College, Linfield College, Oregon Institute of Technology, Reed College, Southern Oregon University, University of Oregon, Uni-

versity of Portland, University of Puget Sound, Western Oregon University, Whitman College, and Willamette University. Oregon State University is in the process of joining Orbis and will become the 14th member of the consortium.

STS seeks research proposals

The Forum for Science and Technology Library Research Committee of ACRL's Science and Technology Section (STS) is seeking proposals for its

Don't miss Dec. 1 award deadline

The deadline for most ACRL and ALA awards is December 1. Take the time to apply or nominate a colleague for one of the many awards and fellowships available. Details about the award program may be found on the Web at <http://www.ala.org/acrl/award2.html>. Or contact Jack Briody at (800) 545-2433, ext. 2516; e-mail: jbriody@ala.org.

Measuring change in academic libraries: NCES starts something new

For many years, the National Center for Education Statistics (NCES) has conducted a biennial Academic Libraries Survey (ALS) as part of the Integrated Postsecondary Education Data Survey (IPEDS). Data tables were published but no comparative reports were done. That situation changed this June with the publication of *The Status of Academic Libraries in the United States: Results from the 1990 and 1992 Academic Library Surveys* (NCES 97-413). This 28-page report, prepared under contract by the American Institutes for Research, compares ALS data over time (1990-92) and displays data using the Carnegie classification.

The report focuses on the following seven indicators:

Library Staff

- Library Staff/Student Ratios
- Library Staff/Instructions Faculty Ratios

Books, Serial Backfiles, and Other Print Materials

- Total Volumes Held
- Total Volumes Held per FTE Student
- Total Library Expenditures
- Library Share of Institutional Budgets
- Expenditures per FTE Student

These seven were chosen because they are important but also because data were available for both 1990 and 1992 from at least 70 percent of the IPEDS universe. Only institutions responding in both years were in-

cluded in the analysis. Values for 1992 are shown together with percentage change in those values since 1990.

Given the present rate of change in the academic library community, it is hard to get excited about statistics from 1990 and 1992, despite the effective way they are presented in this report. It is an important milestone, however, in that it is the first publication on academic libraries from NCES that compares data from different years and uses the Carnegie classification to organize it. Work is already underway on another report, this time by Mathematica, that will update those seven indicators using data from the 1994 ALS, and will also do additional analysis of 1994 data. John Minter Associates has already used a preliminary file of 1994 data from the individual states to produce several publications. Check the John Minter Associates Web site: <http://www.edmin.com/jma>; or phone (800) 444-8110.

Note: A few copies of this report are available from the author of this article (mlynch@ala.org). Otherwise they are available from: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954. The stock number is 065-000-01033-0 and the price is \$4. You may place credit card orders by fax at (202) 512-2250. This product is also available at <http://www.ed.gov/NCES/pubs97/97413.html>.—*Mary Jo Lynch, ALA Office for Research and Statistics*

annual research program at the ALA Annual Conference in Washington, D.C. in June 1998.

Use this opportunity to share with your colleagues recent research or works in progress that address significant issues to science and technology librarianship in its broadest sense.

Proposals will be selected through a blind review process on the basis of timeliness, evidence of scholarship, and relevance to science and technology assembly.

An abstract not exceeding 250 words should convey the title and purpose of the project, its scope, methodology, conclusions, and relevance to science and technology librarianship. Priority will be given to papers that indi-

cate research analyses, either quantitative or qualitative.

Deadline for submission: November 21, 1997. Papers will be selected at the ALA Midwinter Meeting.

Authors of accepted proposals should be committed to providing a 30-minute presentation at the 1998 ALA Annual Conference. Electronic publication of papers through ACRL/STS is an option.

Submit abstract (e-mail preferred) with name, institution, phone, fax, and e-mail address to: Tamera Lee, Vet. Medical Library, 101 Greene Hall, Auburn University, AL 36849-5606; phone: (334) 844-1749; fax: (334) 884-1758; e-mail: TammyLee@Lib.Auburn.Edu. ■

World Class Science References

FROM ACADEMIC PRESS

Encyclopedia of Human Biology

Second Edition

Editor-in-Chief **Renato Dulbecco**

The **Encyclopedia of Human Biology, Second Edition** provides complete coverage of the vast subject area of human biology. Including more than 670 articles in 37 different biological fields, this fully revised edition features one of the most renowned editorial Advisory

Boards ever assembled. The **Second Edition** offers more than 75% new, updated, and revised content including approximately 150 new articles.

Nine-Volume Set

Prepublication Price: \$1799.00*

September 1997, c. 7000 pp., \$2100.00/ISBN: 0-12-226970-5

*Prepublication price expires on December 31, 1997.

Visit <http://www.apnet.com/human/> for more information.

The Perfect Complement to the Methods in Enzymology Series

Comprehensive Biological Catalysis

A Mechanistic Reference

Edited by **Michael Sinnott**

KEY FEATURES

- ◆ Offers the first comprehensive treatment of enzyme catalysis from a chemical viewpoint
- ◆ Lists enzyme reactions by chemical type rather than biological process catalyzed
- ◆ Presents enzyme catalysis from a chemical perspective
- ◆ Provides clear explanations of chemical concepts in "chemical lexicon"

Four-Volume Set

Prepublication Price: \$750.00* (tentative)

October 1997, c. 1200 pp., \$899.00 (tentative)/ISBN: 0-12-646860-5

*Prepublication price expires on December 31, 1997.

Visit <http://www.apnet.com/catalyst/> for more information.

Encyclopedia of Mental Health

Editor-in-Chief **Howard S. Friedman**

"A highly competent and highly polished contribution by noted experts in the field."

—ROBERT O. HANSSON, University of Tulsa, Oklahoma

The **Encyclopedia of Mental Health** presents a comprehensive overview of the many factors that affect mental health, as well as illustrating how mental health impacts the individual and society. The three-volume set contains more than 250 peer-reviewed articles on assessment,

theories of personality, specific disorders, therapies, forensic issues, ethics, cross-cultural and sociological aspects, and those factors that aid positive mental health.

Three-Volume Set

Prepublication Price: \$425.00 (tentative)

January 1998, c. 1700 pp., \$499.00 (tentative)/ISBN: 0-12-226675-7

*Prepublication price expires last day of publication month.
