

ACRL honors the 1995 award winners

By Pam Spiegel

Recognizing professional contributions and scholarly research

Eaton wins Atkinson Award

Nancy L. Eaton, dean of library services at Iowa State University of Science and Technology, has been named the winner of the 1995 Hugh C. Atkinson Memorial Award. The award recognizes outstanding accomplishments of an academic librarian who has worked in the areas of library automation or library management, and has made contributions (including risk-taking) towards the improvement of library services, or to library development or research.

Nancy L. Eaton

The chair of the award committee, Thomas W. Leonhardt, said, "Ms. Eaton was chosen because of her leadership locally and nationally and for her successful efforts in diversifying the workplace. She is the author of the final report of the National Agricultural Text Digitizing Project and has served on the OCLC Users Council and Executive Board since 1989."

Eaton's 27-year career has included service as director of libraries then director of libraries and media services at the University of Vermont; automation librarian at the State University of New York at Stony Brook; and catalog librarian, supervisor of the MARC Cataloging Unit, and assistant to the university librarian at the University of Texas at Austin.

She has been active in ALA, OCLC, the Center for Research Libraries, and many other organizations.

The award, \$2,000 and a citation, will be presented during the 1995 ALA Annual Conference in Chicago at the ALCTS Awards Presentation on the morning of Monday, June 26. The Faxon Company also awards a gold giraffe pin designed by Tiffany's to recognize the "sticking your neck out" aspect of this award.

The award is jointly sponsored by ACRL, the Library Administration and Management Association (LAMA), the Library and Information Technology Association (LITA), and the Association for Collections and Technical Services (ALCTS), four divisions of ALA.

Wilson named Dudley Bibliographic Instruction Librarian

Lizabeth (Betsy) Wilson, associate director of libraries for public services at the University of Washington, is the 1995

winner of the ACRL Bibliographic Instruction Section's Miriam Dudley Bibliographic Instruction Librarian Award. The award, honoring the woman whose pioneering efforts in the field of BI led to the formation of ACRL's Bibliographic Instruction Section (BIS), recognizes an individual librarian who has made an especially significant contribution to the advancement of BI in a college or research institution.

Lori Arp, chair of the award jury, said of Wilson's selection, "Betsy's outstanding and

Betsy Wilson

Pam Spiegel is assistant editor of C&RL News and production editor of Rare Books and Manuscripts Librarianship

continued contributions to the field of bibliographic instruction have informed an entire generation of BI librarians. Her work reflects the true spirit and intent of the Miriam Dudley Award. She serves as a model to those in the field of BI through her work in all of the award's categories. . . . Through her dedication, intelligence, and energy she has led the way in groundbreaking theory and practice and encouraged growth and development within the field."

In her 16 years as a librarian, Wilson has also served as assistant director of libraries for undergraduate and instructional services, head of the Undergraduate Library, coordinator of online catalog user services, assistant undergraduate librarian, and assistant architecture and art librarian at the University of Illinois at Urbana-Champaign. As a member of ACRL, she served as chair of BIS (1990-91), chair of the Activity Sections Council (1990-91), and on many other committees.

The award, \$1,000 and a plaque, is donated by Mountainside Publishing Company on behalf of its journal *Research Strategies*. It will be presented during the ALA Annual Conference in Chicago at the BIS program, Sunday, June 25, at 2:00 p.m.

Schwartz receives K.G. Saur Award

Charles A. Schwartz, social sciences and humanities bibliographer at Rice University, has been named winner of the 1995 K.G. Saur Award for best article in *College & Research Libraries* for his article titled "Scholarly Communication As a Loosely Coupled System: Reassessing Prospects for Structural Reform" (March 1994).

James F. Williams, chair of the award committee, said, "Mr. Schwartz's article was chosen because it provided a seasoned analysis of the organizational dynamics surrounding a complex issue. It was a wonderful critique of the field from a colleague."

Schwartz has been in his current position since 1987. A graduate of Denison University, he received his MLS from Indiana University and his Ph.D. in foreign affairs from the University of Virginia.

Charles A. Schwartz

Schwartz will receive \$500 and a plaque, donated by the K.G. Saur publishing company, at the ACRL Membership Meeting, Monday, June 26, 4:00-4:30 p.m., following the joint ACRL/LITA President's Program during the ALA Annual Conference in Chicago.

Doctoral Dissertation Fellowship awarded to Danuta A. Nitecki

Danuta A. Nitecki, associate director for public services at the University of Maryland, College Park, has been awarded the 1995 ACRL/ISI Doctoral Dissertation Fellowship for her dissertation titled "An Assessment of the Applicability of SERVQUAL Dimensions As Customer-Based Criteria for Evaluating Quality of Services in an Academic Library."

Danuta A. Nitecki

Lawrence J. McCrank, chair of the award committee, said, "The committee found this proposal to merit support because of its timeliness in an era of accountability and emphasis on assessment in higher education other than the traditional model of library inventory data, and current focus on customer satisfaction based largely on qualitative factors."

Nitecki's career has included positions as coordinator of Illinois research and reference activities at the University of Illinois at Urbana-Champaign; and coordinator of automated information retrieval services, head of the Interlibrary Services Department, and interlibrary loan librarian at the University of Tennessee.

The award, \$1,000 and a plaque, is donated by the Institute for Scientific Information (ISI) and will be presented at the ACRL Membership Meeting, Monday, June 26, 4:00-4:30 p.m., following the joint ACRL/LITA President's Program during the ALA Annual Conference in Chicago.

Schmidt receives Lazerow Fellowship

Karen A. Schmidt, acquisitions/binding librarian at the University of Illinois at Urbana-Champaign, has been awarded the 1995 Samuel Lazerow Fellowship for Research in Acquisitions or Technical Services in an Academic or Research Library.

Donated by the Institute for Scientific Information, the award fosters advances in acquisitions or technical services by providing fellow-

ships to librarians for travel or writing in those fields.

Schmidt's research project proposal, "Marketing to Libraries," will be conducted in two parts. Part One will include in-depth discussions with publishers to verify the various techniques they use to market their books to libraries. Part Two will use the results of those discussions to formulate a survey that will be sent to 1,200 libraries.

Julia Gammon, chair of the award committee, said, "The committee felt that this proposal was significant in that it will collect empirical data concerning the way publishers can best market books to libraries. Little has been previously written in this area and most is anecdotal evidence."

Schmidt has also served as assistant acquisitions librarian and head of the Bibliographic Searching Unit at Illinois State University; head of regional campuses technical services, Latin American bibliographer and cataloger, and head of the Latin American Reading Room at Ohio State University. She authored *Understanding the Business of Acquisitions* (ALA, 1990).

The award, \$1,000 and a citation, will be presented during the ALA Annual Conference in Chicago at the ACRL Membership Meeting, Monday, June 26, 4:00-4:30 p.m., following the joint ACRL/LITA President's Program.

EBSS Award goes to Hannelore Rader

Hannelore B. Rader, director of the University Library at Cleveland State University, has been named winner of the 1995 Distinguished Education and Behavioral Sciences Librarian Award. This award is sponsored by ACRL and its Education and Behavioral Sciences Section (EBSS) and honors a distinguished academic librarian who has made an outstanding contribution as an education and/or behavioral sciences librarian through accomplishments and services to the profession.

Karen A. Schmidt

Hannelore B. Rader

Laurene E. Zaporozhetz, chair of the award jury, said, "Hannelore B. Rader was instrumental during a critical stage of development of the Education and Behavioral Sciences Section [of ACRL]. During the late '70s and early '80s her leadership assisted in documenting the history and founding of the section, standardizing reporting mechanisms, beginning long-range planning procedures, and overseeing ties to sister sections. . . . Her publications on instruction and orientation have assisted education and behavioral sciences librarians in their daily interactions with library users."

Rader's career has included positions as director of the Library/Learning Center at the University of Wisconsin-Parkside; and coordinator of the Education/Psychology Division, orientation librarian and head of the Orientation Program, and assistant humanities librarian at Eastern Michigan University.

An active member of ACRL, she served as its president in 1986-87, and as chair of EBSS in 1981-82.

The award (a citation) will be presented during the ALA Annual Conference in Chicago at the EBSS meeting on Monday, June 26, 8:00-9:00 a.m.

Halporn wins Nijhoff Award

Barbara Halporn, head of the Collection Development Department at Harvard University's Widener Library, has been awarded the Martinus Nijhoff West European Specialists Study Grant for 1995. The grant of 10,000 Dutch guilders covers air travel to and from Europe, transportation in Europe, and lodging and board in selected sites for a period not to exceed 14 consecutive days.

Halporn plans to use the grant to travel to Basel, Switzerland, and Mainz, Germany, to complete research and manuscript preparation of *The World of Johann Amerbach: Early Printing in Its Social Context*.

James Spohrer, chair of the award committee, said, "The Western European Studies Section (WESS) viewed the research proposed by Dr. Halporn as a valuable contribution to scholarship in Western European book and publishing history, and an important addition to our

Barbara Halporn

knowledge of the sociology of the spread of literacy in the 15th and 16th centuries.”

Before joining the Widener Library at Harvard, Halporn served as librarian for history and philosophy of science, classics, and psychology at Indiana University.

The award will be presented at the WESS Membership Meeting on Monday, June 26, 1995, 11:30 a.m.–12:30 p.m., during the ALA Annual Conference in Chicago.

Oberly Award goes to Bell and Rhodes

George H. Bell and Diane B. Rhodes have won the 1995 Oberly Award for Bibliography in the Agricultural Sciences for their book called *A Guide to the Zoological Literature: The Animal Kingdom* (Libraries Unlimited, 1994).

Bell is science reference librarian at Arizona State University (ASU). His other positions have included information research and support services librarian at ASU; manager of the Pharmaceutical Research Library and pharmaceutical librarian/information specialist at William H. Rorer Co. in Pennsylvania; and acting head of the Science Reference Department at ASU.

Rhodes is life sciences librarian at ASU. Her previous positions include catalog librarian at ASU, rare books cataloger at Juanita College, and monograph cataloger at the University of Wisconsin-Madison.

Mike Haddock, chair of the award committee, said, “The Oberly Committee was highly impressed by the quality of this title and by the amount of loving care that appeared to have gone into its creation. The compilers of the bibliography personally examined and provided evaluative annotations for each of the 1,650 titles included. This is a very well-crafted and executed bibliography.”

The award, given in odd-numbered years, includes a cash prize and citation donated by

George H. Bell

Diane B. Rhodes

the Oberly Endowment Fund. It will be presented at the Science and Technology Section program during the ALA Annual Conference in Chicago, Monday, June 26, 1995, 8:00 a.m.

Jacobson and Jacobson win BIS Publication of the Year Award

Frances F. Jacobson and Michael J. Jacobson are the recipients of the ACRL Bibliographic Instruction Section's 1995 Bibliographic Instruction Publication of the Year Award, which recognizes their article “Representative Cognitive Learning Theories and BI: A Case Study of End User Searching,” (*Research Strategies*, summer 1993).

Frances F. Jacobson is University Laboratory High School librarian at the University of Illinois at Urbana-Champaign (UIUC). Her previous positions include reference librarian and user education coordinator at UIUC; and reference/instruction librarian, and circulation/reserve librarian at Western State College of Colorado.

Michael J. Jacobson is visiting assistant professor in educational psychology and instructional technology at UIUC. His other positions there include post-doctoral research associate and a research assistant in the Center for the Study of Reading. At Western State College of Colorado he served as Computer Science Department coordinator and instructional computing coordinator, and as an instructor of music.

Lori Arp, chair of the award committee, said, “This article presents a groundbreaking merger of three theories of cognitive learning which are then applied within the environment of bibliographic instruction. Jacobson and Jacobson present a flexible example which can be emulated in programs of instruction at all levels. Their synthesis of recent developments in learning theory is masterful, yet easily comprehended within the context of current theory in instruction. This article serves as a model for excellence in both arenas—theory and practice—and demonstrates that it is indeed possible to ‘practice what you preach.’”

The award, a citation, will be presented at the BIS dinner during the ALA Annual Conference in Chicago, Friday, June 23, 1995.

Frances F. Jacobson

“The most comprehensive and detailed compilation of data of international trade ever assembled...This work can be recommended...”—*Library Journal*

★ **COMPREHENSIVE** ★

- Shows more international trade statistics than any other source.
- 1,476 items, 786 subgroups, 63 divisions and 10 major sections of SITC Revision 3.
- Reports any item traded at \$50,000 or larger.
- Trade shown between 23 reporting nations and 150 trading partners providing extensive coverage of commodities traded between non-U.S. countries
- Details both imports and exports.

★ **EASY TO USE** ★
Saves time and research costs

- Standardized form that eliminates difficulties of language, currencies, weights and measures and commodity classifications.
- Converts all reported data into uniform measurements of U.S. Dollars and metric tons for easy comparability.

★ **TIMELY** ★

- Includes data for developing and emerging economies where information is difficult if not impossible to find.
- Latest reported statistics.

★ **UNIQUE** ★

- For more than 30 years, *The World Trade Annual* has been used by researchers in economics and reference librarians worldwide.

THE WORLD TRADE ANNUAL

Now in its 30th Year...
New Edition for 1995

- *The World Trade Picture Is Rapidly Changing*
- *NAFTA, GATT and the Global Economy Are Here*

University of Washington project wins BIS Innovation Award

The UWired Freshman Interest Groups (FIGS) project at the University of Washington (UW) Library, Seattle, is the winner of the 1995 Bibliographic Instruction Section Innovation in Bibliographic Instruction Award.

Led by the library team of Paula Walker, Andrea Bartelstein, Theresa Mudrock, and Anne Zald, with help from Betsy Wilson (associate director of libraries for public services), the UWired FIGS is a collaboration between the University Libraries, undergraduate education, and computing and communications at UW. Its primary goal is to integrate information navigation skills and electronic communication into teaching and learning. Targeting a selected group of students and faculty for a year-long pilot, UWired is serving as a prototype for integrating information and technology use across the disciplines of higher education.

Lori Arp, chair of the award committee, said, "UWired Freshman Interest Group project is a unique, exciting experiment in collaboration through the use of electronic technology. The depth, breadth, and sheer ambition of the pilot has created a rich and informative model which has implications in part or as a whole to many institutions of learning at all levels. In the UWired FIGS program, the importance of technology is placed in the context of utilizing it for academic purposes rather than teaching it as an end in itself."

The award, a citation, will be presented at the BIS dinner during the ALA Annual Conference in Chicago, Friday, June 23, 1995.

Community College awards go to Roark and Hisle

Derrie E. Roark, associate vice-president of learning resources services at Hillsborough Community College in Tampa, Florida, has been chosen to receive the 1995 EBSCO Community College Learning Resources Program Development Award sponsored by ACRL's Community and Junior College Libraries Section (CJCLS) and EBSCO Information Services.

Charles R. Peguese, chair of the award jury, said, "Ms. Roark has

Derrie E. Roark

Anne Zald, Theresa Mudrock, Paula Walker, and Andrea Bartelstein lead the UWired FIGS project at the University of Washington.

helped create a state-wide automation system that is the envy of community colleges across the country. Her work with the College Center for Library Automation Advisory Board succeeded in putting in place a statewide automation network."

Roark's career has included service as director of the Office of Inservice Training and Development at Pensacola Junior College, learning resources specialist at Odessa College, and assistant to the librarian in the Louisiana & Rare Book Rooms at Louisiana State University.

W. Lee Hisle, director of learning resource services at Austin Community College, has been chosen to receive the EBSCO Community College Learning Resources Leadership Award.

Peguese said of Hisle, "Lee has been an acknowledged leader within the Community and Junior College Library Section (CJCLS) and the National Council for Learning Resources (NCLR). He truly deserves this national recognition for his outstanding leadership."

Hisle's career includes service as director of learning resource services at Austin Community College's Rio Grande Campus; library director/librarian at Lexington Technical Institute; and librarian/media specialist at Henderson Community College. He was cofounder of NCLR, an affiliate of the American Association of Community Colleges, and served as chair of CJCLS from 1989 to 1990, and is currently ACRL's councillor.

The awards, \$500 and a plaque, are donated by EBSCO Subscription Services and will be

W. Lee Hisle

presented at the CJCLS business meeting during the ALA Annual Conference in Chicago, Saturday, June 24, 1995, 8:00–9:30 a.m.

Oram wins award for best article in *RBML*

Richard W. Oram, librarian of the Harry Ransom Humanities Research Center at the University of Texas at Austin, is the winner of the 1995 *Rare Books and Manuscripts Librarianship (RBML)* Award for best article appearing in the preceding two volumes of *RBML*. In citing his article, "The New Literary Scholarship, the Contextual Point of View, and the Use of Special Collections" (volume 8:1, 1993), Joe Springer, chair of the award committee, said, "Oram's thoughtfully presented article is a careful examination of his topic and a useful assessment of its implications for the practice of special collections librarianship. It meets well all the criteria of the award: significance, originality, thoroughness, timeliness, and pertinence to issues relating to the theory and practice of special collections librarianship."

Richard W. Oram

Oram has also served as director of the Ward M. Canaday Center for Special Collections at the University of Toledo, and special collections librarian at Washington & Lee University. As a member of ACRL he currently serves as a member of the Rare Books and Manuscripts Section's (RBMS) Executive Committee and as chair of the RBMS Publications Committee. He previously served as chair of the *RBML* Award Committee (1992–93) and as a member of the RBMS Exhibition Catalogue Awards Committee (1986–90).

The award, \$1,000 and a certificate donated by Christie, Manson & Woods, Inc., will be presented at the RBMS program during the ALA Annual Conference in Chicago, Sunday, June 25, 1995.

The award, \$1,000 and a certificate donated by Christie, Manson & Woods, Inc., will be presented at the RBMS program during the ALA Annual Conference in Chicago, Sunday, June 25, 1995.

Exhibition catalogs recognized by Leab Awards

There are two winners, one honorable mention, and one special award for the Katharine Kyes Leab and Daniel J. Leab *American Book Prices Current* Exhibition Catalogue Awards for 1995. In Division One (expensive) the winner

is "History in Deed: Medieval Society and the Law in England, 1100–1600," by Carol Symes, submitted by the Harvard Law School Library. Elaine B. Smyth, chair of the award committee, said, "This catalog takes what is inherently a very specialized topic . . . and gives it broader appeal by showing how the materials can be used by researchers in diverse fields. What could have been a very dry subject is enlivened and handsomely presented."

In Division Three (inexpensive) the winner is "Eric Gill: The Cell of Good Living," by Margaret L. Smith, submitted by the Houghton Library at Harvard University, Department of Printing and Graphics. Smyth said, "This compact and inexpensively produced catalog makes beautiful and appropriate use of the type and art created by its subject. . . . It packs a lot of information into a slight, easy-to-handle format."

An honorable mention in Division One (expensive) was given to "J. K. Lilly Jr., Bibliophile," by Joel Silver, submitted by the Lilly Library at Indiana University. Smyth said, "The committee felt this catalog merited honorable mention because of its excellent marriage of content and design. Thoroughly researched, well written, and handsomely produced, it is a model of its kind."

A Special Award of Merit was given to the Huntington Library for "The Last Best Hope of Earth: Abraham Lincoln and the Promise of America" by John H. Rhodehamel and Thomas F. Schwartz. Smyth said, "This catalog thoroughly records what may well have been the largest and most comprehensive exhibition of original Lincoln materials to date. The Special Award of Merit recognizes the remarkable achievement of the Huntington Library in garnering and coordinating private, institutional, and corporate support for the exhibition catalog and extensive educational programs that it organized."

Printed citations given by ACRL's Rare Books and Manuscripts Section (RBMS), will be presented to the winners at the RBMS program during the ALA Annual Conference in Chicago, Sunday, June 25, 1995, 2:00 p.m. ■

Health Industry QuickSource is...

The only health care information resource directory you and your patrons will need.

Comprehensive

HIQS provides immediate access to detailed information on the most popular media resources available as well as many lesser-known products and services that provide vital information not found elsewhere. Over 1,000 pages of individual product listings that include thorough Descriptions, Special Features, Publisher and Vendor Contact Information, Time Span Covered, Frequency of Publication and Updates, Subject Areas Covered, and more. This single comprehensive source of information will be all that you need to find the media products that will complete your library collection and assist your patrons in finding the information resources they seek. If you need it, you will find it in the HEALTH INDUSTRY QuickSource.

Accurate

Not simply a compilation of data from third-party sources, QuickSource Press directly obtains the most current information on the latest products available from the publishers, producers, and vendors of each product listed in HIQS. Contact with these primary information providers is continually maintained to ensure that the data provided is the most accurate, current, and comprehensive possible.

Easy-to-Use

Thoroughly indexed by over 70 subject areas covered and by the type of media, listings in HIQS are presented in a convenient and easy to read format that will allow you to quickly find the resources that cover the topics of interest to you and those you support.

Satisfaction Guaranteed

The type of information found in HEALTH INDUSTRY QuickSource and the format in which it is presented is the result of a continuous assessment of your particular information needs through your valuable feed-back and suggestions. If for any reason you are not completely satisfied, simply return the directory for a full refund. QuickSource Press is firmly committed to guaranteeing your complete satisfaction with HIQS.
