

Notes to authors

INDONESIAN JOURNAL of TROPICAL and INFECTIOUS DISEASE

This journal is a peer-reviewed journal established to promote the recognition of emerging and reemerging diseases specifically in Indonesia, South East Asia, other tropical countries and around the world, and to improve the understanding of factors involved in disease emergence, prevention, and elimination.

The journal is intended for professionals in infectious diseases and related sciences. We welcome contributions from infectious disease specialists in academia, industry, clinical practice, public health and pharmacy, as well as from specialists in economics, social sciences and other disciplines. For information on manuscript categories and suitability of proposed articles see below and visit e-journal. unair.ac.id/index.php/IJTID/index. Indonesian Journal of Tropical and Infectious Disease is published in English.

I. INSTRUCTIONS TO AUTHORS

- **ARTICLE STRUCTURE** Please kindly check our **Template**
- **TITLE PAGE.** Give complete information about each author (i.e., full name, graduate degree(s), affiliation and the name of the institution in which the work was done). Clearly identify the corresponding author and provide that author's mailing address (including phone number, fax number, and email address).
- **ABSTRACT.** A concise and factual abstract is required. The abstract should state briefly the purpose of the research, the principal results and major conclusions. Abstract should be 250-300 words. It should include objectives and rationale of the study, method used, main findings and significance of findings. It should be accompanied by up to **5 Keywords**. Abstract should be available in English and Bahasa.
- **INTRODUCTION.** State the objectives of the work and provide an adequate background, avoiding a detailed literature survey or a summary of the results.
- **MATERIAL AND METHOD.** Provide sufficient detail to allow the work to be reproduced. Methods already published should be indicated by a reference: only relevant modifications should be described.
- **RESULT AND DISCUSSION.** Results should be clear and concise. Discussion should explore the significance of the results of the work, not repeat them. A combined Results and Discussion section is often appropriate. Avoid extensive citations and discussion of published literature.
- **CONCLUSION (FOR RESEARCH REPORT)/ SUMMARY (FOR LITERATURE REVIEW).** The main conclusions/summary of the study may be presented in a short Conclusions section, which may

stand alone or form a subsection of a Discussion or Results and Discussion section.

- **ACKNOWLEDGEMENT.** All acknowledgements including financial support should be mentioned under this heading. List here those individuals who provided help during the research (e.g., providing language help, writing assistance or proof reading the article, etc.).
- **REFERENCES.** Minimum 15 references. References wrote on Vancouver (superscript) Style. In the Vancouver Style, citations within the text of the essay/paper are identified by Arabic numbers in round brackets or Arabic numbers in superscript. This applies to references in text, tables and figures.
The Vancouver (Superscript) System assigns a number to each reference as it is cited. A number must be used even if the author(s) is named in the sentence/text. e.g. Smith¹⁰ has argued that...
The original number assigned to the reference is reused each time the reference is cited in the text, regardless of its previous position in the text. When multiple references are cited at a given place in the text, use a hyphen to join the first and last numbers that are inclusive. Use commas (without spaces) to separate non-inclusive numbers in a multiple citation e.g. ^{2,3,4,5,7,10} is abbreviated to...
The placement of citation numbers within text should be carefully considered e.g. a particular reference may be relevant to only part of a sentence. As a general rule, reference numbers should be placed outside full stops and commas and inside colons and semicolons, however, this may vary according to the requirements of a particular journal.
Examples – There have been efforts to replace mouse inoculation testing with in vitro tests, such as enzyme linked Immunosorbent assays^{57,60} or polymerase chain reaction²⁰⁻²² but these remain experimental. Moir and Jessel maintain “that the sexes are interchangeable”.¹
- **TABLES.** Tables should be embedded in page. Provide footnotes and other information (e.g., source/copyright data, explanation of boldface). Tables should be no wider than 17 cm. Condense or divide larger tables.
- **FIGURES.** Provide figures embedded in page. Figures should be drawn professionally. Photographs should be sharp (contrast). Provide footnotes and other information (e.g., source/copyright data, explanation of boldface) in figure legend. Submit image files (e.g., electromicrograph) without text content as high-resolution (300 dpi/ppi minimum) TIFF or JPG files.
- **PLAGIARISM CHECK.** Please kindly tell us if you already use plagiarism check (Turnitin, etc.).

II. TYPES OF ARTICLES

- **PERSPECTIVES.** Articles should be under 3,500 words and should include references, not to exceed 40. Use of subheadings in the main body of the text is recommended. Photographs and illustrations are encouraged. Provide a short abstract (150 words), a one-sentence summary of the conclusions, and a brief biographical sketch. Articles in this section should provide insightful analysis and commentary about new and reemerging infectious diseases and related issues. Perspectives may also address factors known to influence the emergence of diseases, including microbial adaptation and change, human demographics and behavior, technology and industry, economic development and land use, international travel and commerce, and the breakdown of public health measures. If detailed methods are included, a separate section on experimental procedures should immediately follow the body of the text.
- **SYNOPSES.** Articles should be under 3,500 words and should include references, not to exceed 40. Use of subheadings in the main body of the text is recommended. Photographs and illustrations are encouraged. Provide a short abstract (150 words) a one-sentence summary of the conclusions. This section comprises concise reviews of infectious diseases or closely related topics. Preference is given to reviews of emerging and reemerging diseases; however, timely updates of other diseases or topics are also welcome. If detailed methods are included, a separate section on experimental procedures should immediately follow the body of the text.
- **RESEARCH STUDIES AND SCIENTIFIC REVIEW.** Articles should be under 3,500 words and should include references, not to exceed 40. Use of subheadings in the main body of the text is recommended. Photographs and illustrations are encouraged. Provide a short abstract (150 words) a one-sentence summary of the conclusions. Report laboratory and epidemiologic results within a public health perspective. Explain the value of the research in public health terms and place the findings in a larger perspective.
- **POLICY AND HISTORICAL REVIEWS.** Articles should be under 3,500 words and should include references, not to exceed 40. Use of subheadings in the main body of the text is recommended. Photographs and illustrations are encouraged. Provide a short abstract (150 words), a one-sentence summary of the conclusions. Articles in this section include public health policy or historical report that are based on research and analysis of emerging and reemerging disease issues.
- **DISPATCHES.** Articles should no more than 1,200 words and need not be divided into sections. If subheadings are used, they should be general, e.g., “The study” and “Conclusions.” Provide a brief abstract (50 words); references (not to exceed 15); figures or illustrations (not to exceed 2). Dispatches are updates on infectious disease trends and research. The articles include descriptions of new methods for detecting, characterizing, or sub typing emerging or reemerging pathogens. Developments in antimicrobial drugs, vaccines, or infectious disease prevention or elimination program are appropriate. Case reports are also welcome.
- **COMMENTARIES.** Thoughtful discussions (500-1,000 words) of current topics. Commentaries may contain references but not figures or tables.
- **ANOTHER DIMENSION.** Thoughtful essays, short stories, or poems on philosophical issues related to science, medical practice, and human health. Topics may include science and the human condition, the unanticipated side of epidemic investigations, or how people perceive and cope with infection and illness. This section is intended to evoke compassion for human suffering and to expand the science reader’s literary scope. Manuscripts are selected for publication as much for their content (the experiences they describe) as for their literary merit.
- **LETTERS.** Letters commenting on recent articles as well as letters reporting cases, outbreaks, or original research are welcome. Letters commenting on articles should contain no more than 300 words and 5 references; they are more likely to be published if submitted within 4 weeks of the original article’s publication. Letters reporting cases, outbreaks, or original research should contain no more than 800 words and 10 references. They may have 1 figure or table and should not be divided into sections. All letters should contain material not previously published and include a word count.
- **BOOKS, OTHER MEDIA.** Reviews (250-500 words) of new books or other media on emerging and reemerging disease issues are welcome. Name, publisher, number of pages, other pertinent details should be included.
- **ANNOUNCEMENTS.** We welcome brief announcements (50-150 words) of timely events of interest to our readers. (Announcements may be posted online only, depending on the event date).
- **CONFERENCE SUMMARIES.** Summaries of emerging and reemerging infectious disease conference activities are published online only. Summaries, which should contain 500-1,000 words, should focus on content rather than process and may provide illustrations, references, and links to full reports of conference activities.

COPYRIGHT TRANSFER AGREEMENT

The author who submit the manuscript must understand that if accepted for publication, the copyright of the article belongs to *Indonesian Journal of Tropical and Infectious Disease* and Institute Tropical Disease Universitas Airlangga as the publisher of the journal.

Copyright includes the exclusive right to reproduce and deliver articles in all forms and media, including reprints, photographs, microfilm and any other similar reproduction, as well as translation. The author has the right to the following:

1. Duplicate all or part of the published material for use by the author himself as a classroom instruction or verbal presentation material in various forums;
2. Reusing part or all of the material as a compilation material for the author's work;
3. Make copies of published material to be distributed within the institute where the author works.

Indonesian Journal of Tropical and Infectious Disease and Institute Tropical Disease Universitas Airlangga and Editor make every effort to ensure that no false or misleading data, opinions or statements are published in this journal. The contents of articles published on *Indonesian Journal of Tropical and Infectious Disease* are the sole and exclusive responsibility of each author.

Authors must complete and sign the Copyright Transfer of Agreement Form available at <https://goo.gl/XdbW3R>. The form is sent as a supplementary file when submitting articles.

COPYRIGHT TRANSFER AGREEMENT

I, the undersigned, on behalf of all authors, hereby declare that the following article is an original work of the author and has never been published in any medium (proceedings, journals and books).

Manuscript Title :

Authors : 1.
2.
3.

Affiliation :

If this article is accepted for publication in the issue number in *Indonesian Journal of Tropical and Infectious Disease (IJTID)*, then I hereby submit all copyright to *Indonesian Journal of Tropical and Infectious Disease* and Institute Tropical Disease Universitas Airlangga as a journal publisher.

Copyright includes the exclusive right to reproduce and provide articles in all forms and media, including reprints, photographs, microfilms and any other similar reproduction, as well as translation. The author still has the right to the following:

1. Duplicate all or part of the published material for use by the author himself as a classroom instruction or verbal presentation material in various forums;
2. Reusing part or all of the material as a compilation material for further writers' writings;
3. Make copies of published material to be distributed within the institute where the author works.

I am responsible for the entire contents of the submitted article. I would like to make this statement in order to be used as intended. I agree that this transfer of rights also applies to all copies made in connection with the submission of this article and I will also inform this agreement to other authors.
