

PREFACE

We are pleased to present the first open access volume of the Mongolian Geoscientist (MGS). This volume is a part of the celebrations to mark the 60th anniversary of the Mongolian University of Science and Technology and 80th anniversary of the Mongolian Geological Survey.

We would like to remind you that the success of our journal depends directly on the number of quality articles submitted for review. Accordingly, we would like to request your participation by submitting quality manuscripts for review and encouraging your colleagues to submit quality manuscripts for review. MGS will provide authors with high quality, helpful reviews that are shaped to assist authors in improving their manuscripts.

There are eleven articles have been submitted to this volume and that five of them are accepted in this volume. Articles are covering new data and discussions of geochemistry, ore mineralization, geological mapping, remote sensing and environmental issues.

We are very much appreciating your support as we strive to bring MGS the most authoritative journal on geoscience researches. We would like to thank all who kindly contributed their papers for this issue and the editors of MGS for their kind help and co-operation.

We are also indebted to the MongoliaJOL teams for their assistance in preparation and publication of this issue open access.

Batkhisig Bayaraa
