CONTENTS

	<i>Page</i>
1. Computer-aided diagnosis for osteoporosis based on trabecular bone analysis using panoramic radiographs Agus Zainal Arifin, Anny Yuniarti, Lutfiani Ratna Dewi, Akira Asano, Akira Taguchi, Takashi Nakamoto, Arifzan Razak, and Hudan Studiawan	107–112
2. Anti-inflammation effects of <i>Sardinella longiceps</i> oil against paw oedema on <i>Rattus norvegicus</i> induced by 1% carrageenan Rima Parwati Sari and Yenny Sugiharto	113–116
3. The correlation between immunoexpression of estrogen receptor and the severity of periodontal disease Yuliana Mahdiyah Da'at Arina, S. Sunardhi Widyaputra, and Koeswadji	117–121
4. The effectiveness of sharp end and rounded end bristle toothbrush Paulus Januar, Anastasia Susetyo, and Ratih Widyastuti	122–125
5. Contact hypersensitivity after tongue piercing Ananta Herachakri P, Afrini Puspita, Feby Aryani, and Hendri Susanto	126–130
6. Cervical end preparation design on collarless metal ceramic crown to the decrease of bacterial colony Edy Machmud	131–135
7. Treatment of sharp mandibular alveolar process with hybrid prosthesis Sukaedi and Eha Djulaeha	136–140
8. The combination of micalcic, calcium lactate, and vitamin C as post-extraction alveolar bone resorption inhibitor Sri Kentjaningsih	141–145
9. The molecular phenomena of the blaZ genes forming beta-lactamase enzymes structure in <i>Staphylococcus aureus</i> resistant to beta-lactam antibiotics (ampicillin) Mieke Satari	146–150
10. Management of idiopathic alveolar bone necrosis associated with oroantral fistula after upper left first molar extraction Ni Putu Mira Sumarta	151–156
11. Indirect veneer treatment of anterior maxillary teeth with enamel hypoplasia Devi Eka Juniarti	157–161
