

Dental Journal

Majalah Kedokteran Gigi

Vol. 42 • No. 1 January - April 2009

Published quarterly per year

CONTENTS

The effect of toothpaste containing the extract of Kayu Sugi upon plaque formation

Inhibitory effect of *n*-hexane fraction: ethyl acetate from *Artemisia vulgaris* L. on cell culture of epithelial carcinoma of the mouth

Toxicity testing of chitosan from tiger prawn shell waste on cell culture

Chronic gingivitis and aphthous stomatitis relationship hypothesis: A neuroimmunobiological approach

Treatment on temporomandibular joint using occlusion splint

The role of microendodontics in treating mandibular second molar with 5 canals

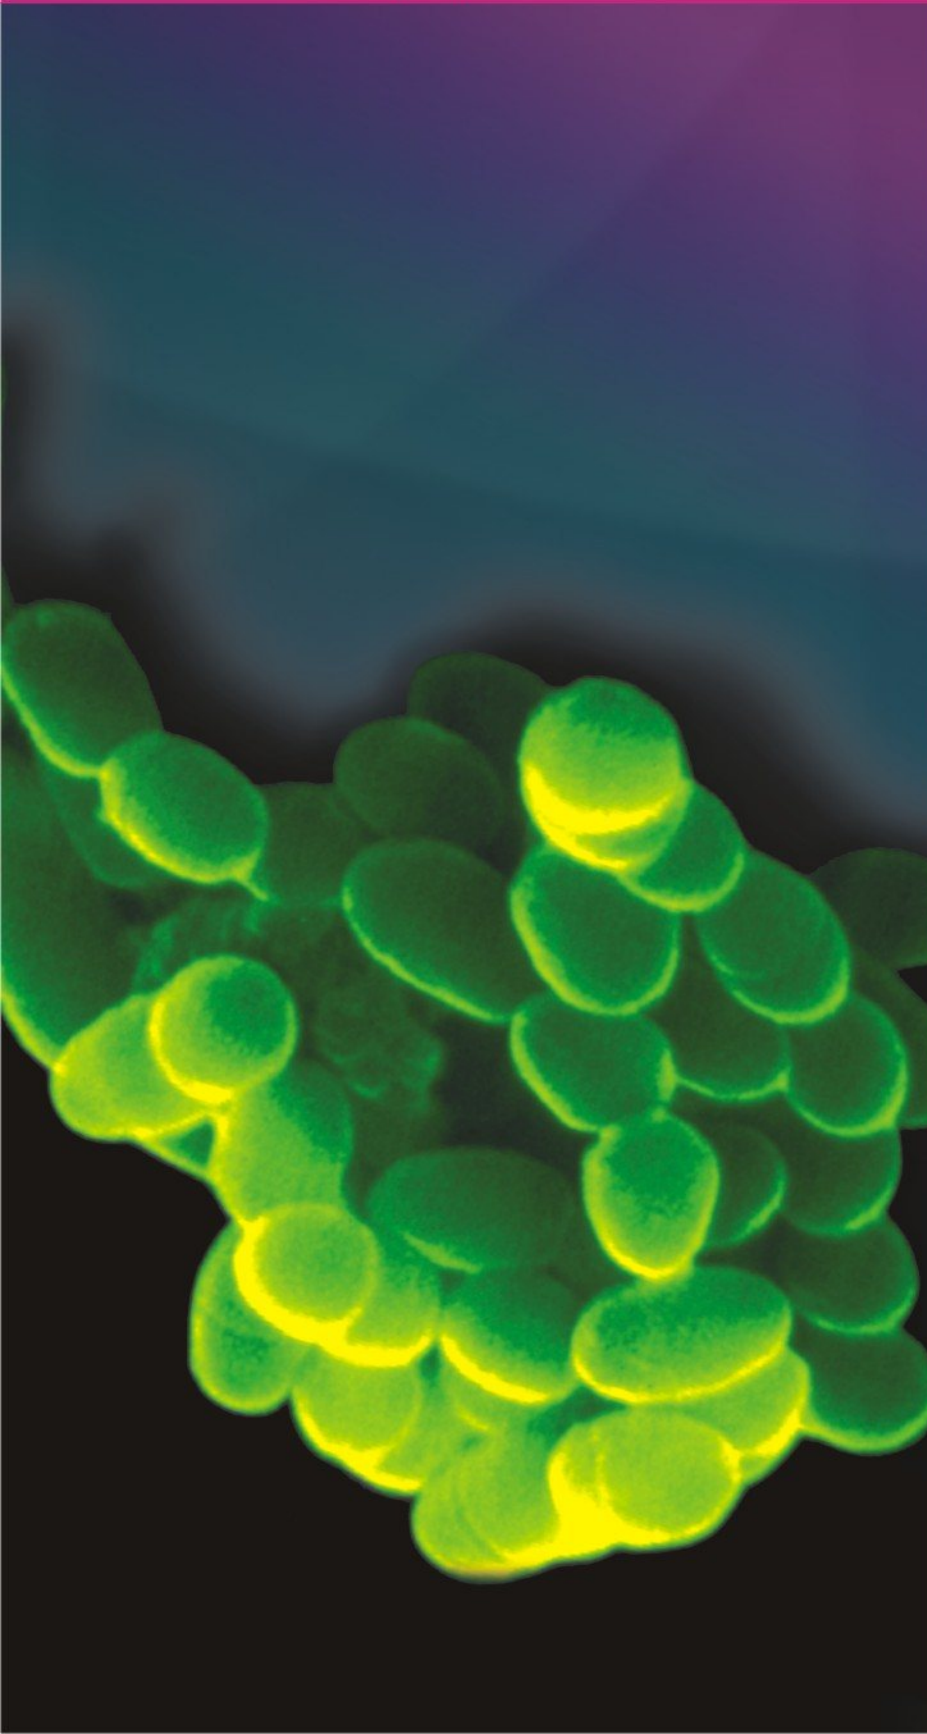

Patient safety oriented to improve patient retention in oral health services

Simple replantation protocol to avoid ankylosis in teeth intended for orthodontic treatment: a review

The transformation of ordinal scale for parametric statistic analysis on dental health questionnaire
