Preface

We are now in the age of 38. In the period of 1968 to 2006, by the support and commitment of Faculty of Dentistry Airlangga University and the customers, we have already made such significant progress on the quality as define below. At first, our journal served our local researchers to publish their articles, and then we served also national researchers in the field of dentistry. We try to serve international researchers to do scientific communication with local researchers by publishing their articles.

Due to the improvement toward international journal, we have already tried to increase the number of English articles in the period of 2002–2005. Recently, at the end of 2005, we succeed to publish all England articles in volume 38 Number 4 October–December 2005. In addition, for the reason of international communication demand, we already have web site (www.fkg.unair.ac.id/web/mkg.htm). To make the sign of our progression's milestone and due to the aesthetic reason, we change our cover. Our new cover reflected our proceed spirits to serve our customers.

Best regard,
Chief editor,
