In the version of this article initially published, the correlation in Table 2 between '1. Cognitive CQ' (row 1, column 1) and '5. Conscientiousness' (row 5, column 1) was mistakenly reported as 1.13. The actual value should have been 0.13. Similarly, the correlation between '3. Motivational CQ' (row 3, column 3) and '7. Extroversion' (row 7, column 3) was mistakenly reported as 1.21. The actual value should have been 0.21. Lastly, the correlation between '2. Metacognitive CQ' (row 2, column 2) and '6. Emotional stability' (row 6, column 2) was mistakenly reported as 1.30. The actual value should have been 0.30. An updated Table 2 is presented here:

TABLE 2: Correlation coefficients between cultural intelligence, personality and identity.
